Summary

B.Tech. Information Technology student graduating in 2027 with hands-on experience in **full-stack web development** through internship and personal projects. Strong foundation in **C++**, **Data Structures & Algorithms**, **React.js**, **Node.js**, and **MongoDB**, with **300+ DSA problems** solved.

Work Experience

Thiranex <i>Full-Stack Development Intern</i>	Aug 2026 – Present <i>Remote</i>
Built 4 full-stack web applications for portfolio, task management, e-commerce, and blogging use cases, implementing authentication, CRUD workflows, responsive interfaces, and RESTful API integration. Developed a task management application with JWT authentication, role-based access control, CRUD operations, and real-time updates, supporting responsive web and mobile interfaces. Created e-commerce and blogging applications with product and order management, user authentication, role-based access control, and comments, integrating frontend workflows with RESTful backend APIs.	

Projects

Classroom Feedback & Analytics System (ClassIntel) <i>React.js, Node.js, Express.js, MongoDB, TypeScript, JWT, REST APIs Live Demo</i>	Dec 2024 – May 2025
Built a full-stack feedback platform with 3 role-based access levels—Student, Instructor, and Admin— using React.js, Node.js, Express.js, MongoDB, TypeScript, JWT authentication, and RESTful APIs. Engineered browser-based tab-switch detection and copy-paste restriction for online quizzes using JavaScript event listeners. Added feedback categorization and MongoDB text search to support course-level filtering and improve feedback discovery.	
AgriSense – Precision Agriculture Management Platform <i>React.js, Node.js, Express.js, MongoDB, LightGBM, Random Forest, GIS</i>	Jul 2026 – Present
Built a precision-agriculture platform integrating 6 data sources—weather, soil, remote sensing, terrain, crop, and spatial data—for crop-yield prediction and pest-risk assessment. Integrated machine-learning based yield prediction and pest-risk classification pipelines with a GIS-based visualization layer. Evaluated the models on the project dataset, achieving 0.93 R² for yield prediction and 91% accuracy for pest-risk classification.	

Technical Skills

Languages: C++, JavaScript (ES6+), TypeScript, SQL
Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, RESTful APIs
Frontend: React.js, HTML5, CSS3, Tailwind CSS, Vite, Responsive Web Design
Backend: Node.js, Express.js, JWT Authentication, RBAC, CRUD Operations
Databases: MongoDB, MySQL, Mongoose ODM
Tools: Git, GitHub, Vercel, Postman

Education

ABES Engineering College, Ghaziabad <i>B.Tech. in Information Technology Dr. A.P.J. Abdul Kalam Technical University</i>	Aug 2023 – Present <i>CGPA: 8.0 / 10.0</i>
Sant Atulanand Convent School, Varanasi <i>Senior Secondary (Class XII), CBSE</i>	2023 <i>89.02%</i>
Sant Atulanand Convent School, Varanasi <i>Secondary (Class X), CBSE</i>	2021 <i>94.6%</i>

Achievements & Certifications

Solved 300+ Data Structures and Algorithms problems across LeetCode, GeeksforGeeks, and CodeChef; achieved a 3-Star SQL rating on HackerRank.
Certifications: Data Structures & Algorithms – Infosys Springboard, 2025; Google Cloud Essentials & Generative AI – Google, 2025; Mastering Agentic Design Patterns – Udemy, 2026.
