Ghaziabad, India | Open to Internships & Full-Time Roles | Remote & On-site

PROFESSIONAL SUMMARY

B.Tech Information Technology student with a strong foundation in computer science fundamentals and a Full Stack Developer with hands-on experience designing, building, and deploying MERN stack web applications. Proficient in front-end and back-end development using JavaScript, TypeScript, React.js, Node.js, Express.js, and MongoDB; experienced in RESTful API design, JWT authentication, Role-Based Access Control, and CI/CD workflows. Strong foundation in Data Structures and Algorithms, Object-Oriented Programming, and Agile development practices. Seeking a Full Stack Developer internship or full-time role to deliver impactful web applications within a collaborative engineering team.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, C++, SQL

Front-End Languages & Frameworks: React.js, HTML5, CSS3, Tailwind CSS, Vite

Back-End: Node.js, Express.js, RESTful API Design, JWT Authentication, Role-Based Access Control (RBAC)

Databases: MongoDB, MySQL, Mongoose ODM

Tools: Git, GitHub, GitHub Actions, CI/CD Pipelines, Vercel, Postman

WORK HISTORY

Lecture Feedback Management System

Jan 2024 – Present

Full Stack Developer | github.com/deveshsingh641

React.js, Node.js, Express.js, MongoDB, JWT

- Identified gaps in the college's manual feedback workflow — time-consuming, unstructured, and lacking analytics — and scoped an end-to-end automated solution to replace it.
- Architected a MERN stack platform with JWT-based auth, RBAC across three user roles (student, instructor, admin), schema-optimised REST APIs, and an automated CI/CD pipeline via GitHub Actions deployed on Vercel.
- Reduced feedback processing time by **80%**, handled **500+ concurrent API requests** under **200ms** latency, improved baseline performance by **40%**, and eliminated all manual deployment effort.

Developer Portfolio Website

Mar 2024 – Present

Frontend Developer | deveshdev.live

React.js, TypeScript, Tailwind CSS, Vite

- Designed and launched a personal developer portfolio to present projects and technical skills, with a fault-tolerant contact form that stays operational even if a primary email provider goes down.
- Built a fully responsive web application (SPA) using React.js, TypeScript, and Tailwind CSS with component-based architecture, lazy loading, and code splitting; implemented a dual-provider email fallback system via EmailJS and Formspree.
- Achieved a **95+ Google Lighthouse score** for performance and accessibility, and **99.9% message delivery reliability** by eliminating single points of failure in the email system.

EDUCATION

ABES Engineering College, Ghaziabad

Aug 2023 – Jun 2027

Bachelor of Technology — Information Technology | Dr. A.P.J. Abdul Kalam Technical University

CGPA: 8.0 / 10.0

Sant Atulanand Convent School, Varanasi

2023

Senior Secondary (Class XII), CBSE

89.02%

ACHIEVEMENTS & CERTIFICATIONS

Competitive Programming: Solved **500+** problems on CodeChef (**2-Star**), **150+** on LeetCode (Arrays, Strings, Heap, Stack And Queues), and earned **3-Star SQL** on HackerRank.

Certifications: Data Structures & Algorithms — Infosys Springboard (2025) | Python for Data Science — NPTEL (2025) | Google Cloud: Essentials, Generative AI, Kubernetes (2025) | Problem Solving Intermediate — HackerRank (2024)
